PREFACE

The Indian Council of Agricultural Research (ICAR) is the apex scientific body responsible to guide, promote and coordinate agricultural **research, education,** and **extension** in the country. These functions are carried out through a vast network of 39 agricultural research institutes, 8 national research centres, 5 project directorates, 66 all-India Coordinated research projects, 23 agricultural universities, 2 national centres for communication and training in pulses and oilseeds, 2 special projects for tribal and backward regions, national demonstrations in 48 districts, 105 operational research centres, 87 Krishi Vigyan Kendras and 115 lab-to-land centres. There are at present 532 ad-hoc research schemes in operation at different locations — 423 in agriculture, 73 in animal sciences, 23 in fisheries and 13 in agricultural education. Most of the institutes have their research stations located in different states. Similarly, most of the universities have their colleges or campuses and research stations where ICAR projects are in operation. So far, there is no consolidated information available about the location of these centres.

The present publication is an attempt to provide a single source of such information. It contains state-wise location of ICAR institutes, projects and centres concerned with research, education and extension in the entire country. Hopefully, it would meet the long-awaited requirement of its users.
